## | 01 CEO MESSAGE

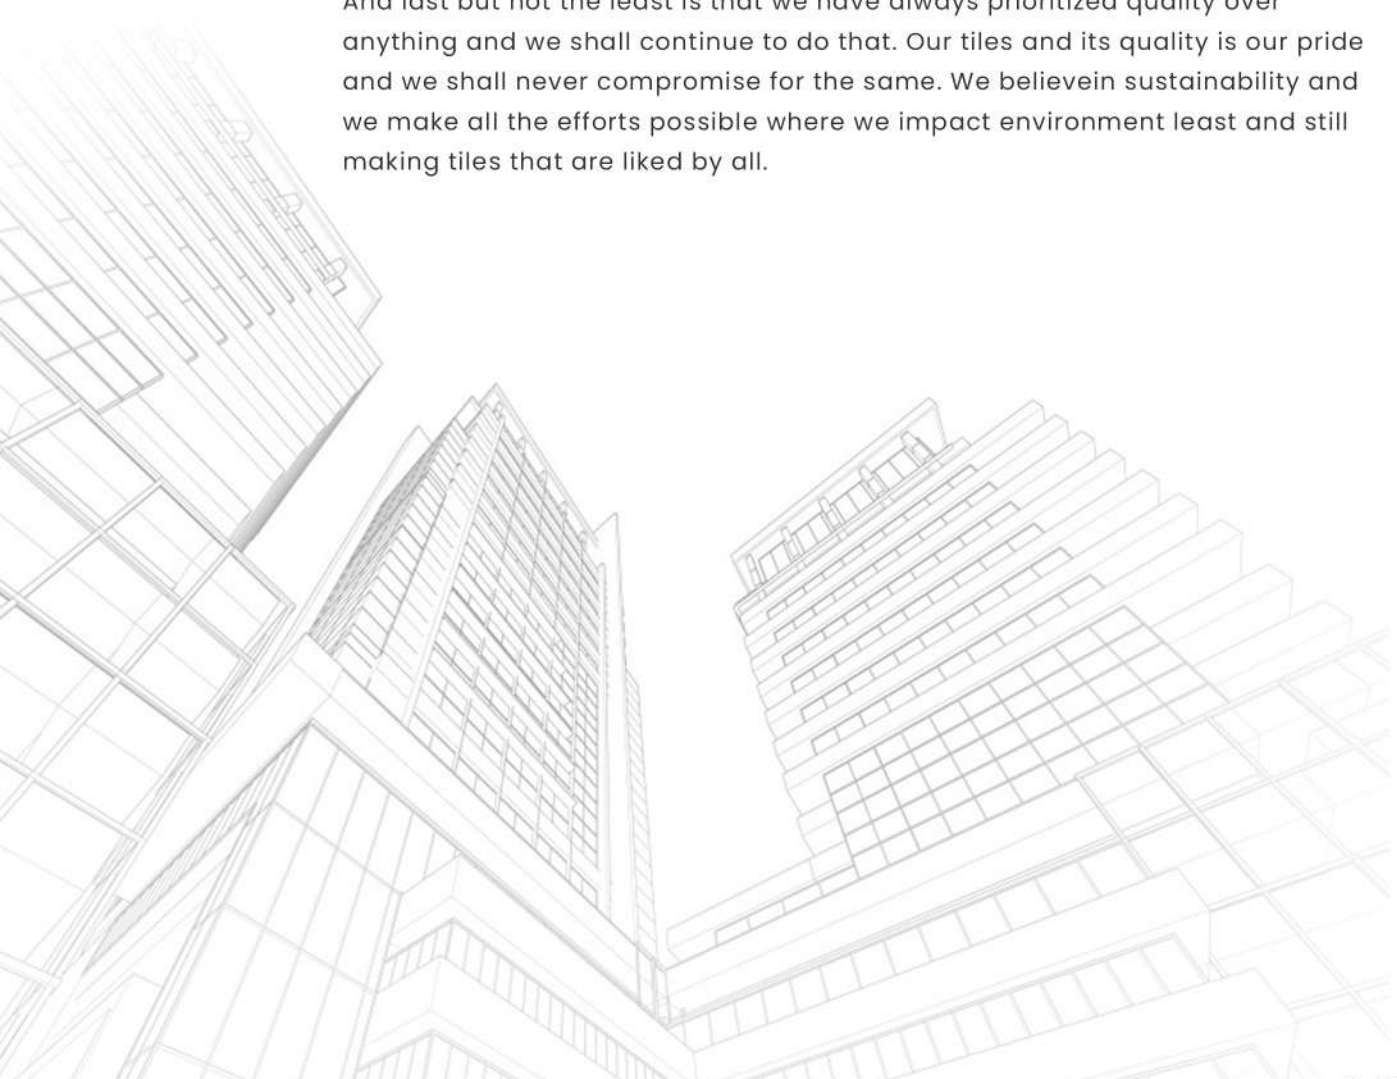

If beautiful was the only way of life then everything beautiful would have a value but this is not true. Beauty may fade away with time but what matters more is the inner strength. The characteristic of a substance and all that has gone in making of that substance is way more important. Capron vitrified comes up with this ideology and therefore we stand where we are today. We believe in innovation, design and perfection.

When we say innovation, it does not only mean that we serve something new every day; but it means that we bring to you something that is unique may be not every day but at a regular interval.

When we say that we give designs, does not mean that each and every person will love it but each and every person will certainly admire it.

When we say that we believe in perfection means that we strive to inculcate everything starting from selecting raw materials to machines to technology, man power to finished product everything with a keen eye on it.

And last but not the least is that we have always prioritized quality over anything and we shall continue to do that. Our tiles and its quality is our pride and we shall never compromise for the same. We believe in sustainability and we make all the efforts possible where we impact environment least and still making tiles that are liked by all.

## | 02 COMPANY OVERVIEW

Capron Vitrified was set up with an aim to provide world class tiles in the year 2016 and fortunately since then we have never turned back. In short span of time we have successfully managed to become one of the leading distributor and retailers of tiles in India and we have been supplying our range of tiles to architects, designers, developers and to individuals. We have always believed in giving quality tiles at a rate that relates to every individual. Our classic ranges of tiles are for everyone and we have a general rule where we never compromise on quality.

Our efficient team members ensure that the demand of tiles is met at pan India level and we always come up with a strategic planning so that no one is deprived of the stock. The management of stock is done keeping in mind that the distribution of tiles is made as per the need and demand.

---

We are proud to say that we make use of brilliant technology and skilled staff members that makes our tiles one of the best in Asia. Our manufacturing units are well facilitated with machines and man power that gives the best outcome. We believe in keeping relationship with our customers intact by giving them the quality of tiles they desire for.

Your Final Destination.

## | OUR VISION

capron aims to provide an enviable range of value for money ceramic wall & floor tiles as well as provide a unique and competitive range of bathroom products.

It is important that our product portfolio is unique as well as being in keeping with the latest trends. We also aim to provide a broad spectrum of ceramics to suit all age groups and tastes.

## | OUR MISSION

To provide quality branded products with exclusive quality and end-user service.

# BRAND PROMISE

## | 03 TECHNOLOGY

### | HLT PRESS

The technology is fast and precise that allows the loading of large size keeping the quality same. Maximum pressing force is 50.000 KN, clearance between columns is 1750 mm and maximum plunger stroke is 180 mm. There is a pre-loaded loop structure that is designed using finite elements technique that ensures absorption of massive forces even at high output rates without any problems. The delivery pump rate is doubled hence more output is given even when tiles are thicker and it allows large size tiles to be made.

### MODENA KILN - 220 METER |

The Modena single layer kiln provides high quality insulation, reliable drive system and optimized consumption. It can easily assemble and transported and it offers adjustment. The most important thing about it is that it is excellent in flexibility.

### | KEDA POLISHING LINE

It comes with Hi-Efficiency ND5Po827 combination polishing heads with long swing abrasive line contact of abrasive and tile guaranteed good cooling and grinding results. It has double reducer drive for crossbeam swing and it is stable and reliable. It has 27 heads Nano polishing machine.
